

Industry Experts to Lead Peritus

New oil and gas start-up, Peritus, has announced the appointment of its six man leadership team, attracting some serious engineering clout from across the globe to bolster its industry leading aspirations in the competitive subsea and floating systems sector.

The man charged with the ultimate vision for Peritus is Steve Hindmarsh. For the past 30 years Steve has worked in technical, managerial and executive positions for some of the biggest names in the offshore business, delivering world-class projects in the Netherlands, Malaysia, the United Kingdom and Australia. Now, as Chief Executive Officer and Managing Director of Peritus Asia Pacific, Steve will oversee and direct the growth of the company through three strategic offices located in Australia, the US and the UK.

“We’ve brought together some of the best people in the business here at Peritus to specifically cater to oil and gas developments in remote, hostile and deepwater environments”, says Steve. “As more accessible oil and gas deposits are depleted there will be a real need for our area of expertise”.

While the initial Peritus’ Asia Pacific operations will be based in Perth, Western Australia, the Peritus Americas office will be Houston based. President of Peritus Americas Dr. Chris Tam has worked in and around the US in senior technical and managerial roles for over a decade. He brings over 25 years of engineering expertise to Peritus’ endeavours in the region, having previously worked on subsea and pipeline projects in the Middle East, Europe, Asia and Africa.

Peritus’ UK office will concentrate on the company’s projects in Europe, Africa and the Middle East. Graham Taylor will head this office, bringing some 28 years of experience in the offshore/subsea engineering industry to the table. In addition to his extensive experience in Europe, Graham has worked on prominent engineering projects in Egypt, Nigeria, Angola, Israel, Libya and Oman.

Completing Peritus’ leadership team is Operations Senior Vice President, Peritus Americas, Peter Breese; Director of Operations and Business Acquisition Europe, Africa and Middle East, Ian Nash; and Director of Engineering and Business Acquisition, Asia Pacific, Stephen Rivers.

“I feel that the calibre of management we have onboard will enable us to be highly competitive. I’ve worked with all of the leadership team before and am confident that we have assembled a team that can truly deliver for our clients”, says Steve.

About Peritus

Peritus provides advanced subsea and floating systems engineering and project management services for field development and transportation systems to offshore projects across the globe, with a particular focus on difficult and deepwater environments.

Peritus provides services in all phases of project development from concept evaluation through Front End Engineering Design (FEED), detailed design, PMC, EPCM, construction, commissioning and operations with a strong competence in Concept Evaluation and FEED.

Peritus' business model works on a global network of regional engineering centres which enable specialised skills, knowledge and expertise to be shared across global operations. This model delivers lower cost, technically superior subsea and marine solutions for clients.
